

## UGI Reports First Quarter Results and Solid Progress on Rebalancing Strategy

February 3, 2022

VALLEY FORGE, Pa.--(BUSINESS WIRE)--Feb. 2, 2022-- UGI Corporation (NYSE: UGI) today reported financial results for the fiscal quarter ended December 31, 2021.

### HEADLINES

- Q1 GAAP diluted earnings per share ("EPS") of \$(0.46) and adjusted diluted EPS of \$0.93 compared to GAAP diluted EPS of \$1.44 and adjusted diluted EPS of \$1.18 in the prior-year period.
- Results reflect the impact of all-time record warm weather in the U.S. in December and significant increases and volatility in commodity prices on LPG and energy marketing margins in Europe, partially offset by incremental contribution from strategic investments in the natural gas businesses.
- Received a rating upgrade to "AA" in the MSCI ESG rating assessment in December 2021.
- Obtained regulatory approval for the intended joint venture with SHV Energy and announced a 15-year agreement with Vertimass to utilize their catalytic technology to produce renewable fuels.
- Completed the previously announced acquisition of Stonehenge on January 27, 2022.
- Filed a gas base rate case for UGI Utilities for an overall distribution rate increase of approximately \$83 million and a request for a weather normalization adjustment mechanism with the PA Public Utility Commission on January 28, 2022.

Roger Perreault, President and Chief Executive Officer of UGI Corporation, stated "This quarter, we navigated the challenging macro-economic environment that provided rising cost inflation and a tight labor market. With this backdrop, UGI reported lower first quarter 2022 adjusted results, which were impacted by unfavorable weather in the U.S. as the country experienced the warmest December on record. AmeriGas reported lower volumes due to weather, the impact of customer service challenges from the prior year after establishing the new operating business model, and the effect of higher commodity prices on customer usage. We also saw significantly higher and unprecedented volatility in commodity prices in Europe that had a negative impact on average LPG unit and energy marketing margins at UGI International. Our natural gas businesses delivered strong results, despite the warmer weather, due to incremental earnings from Mountaineer and higher margin from renewable energy marketing activities.

"Consistent with our past practice, we do not discuss adjusted EPS guidance until the completion of the second fiscal quarter. However, we remain focused on executing our strategy in order to achieve our long-term EPS growth commitment of 6 – 10%. We have developed a robust plan to leverage our proven capabilities of focused margin and expense management and expect increased benefits as fiscal 2022 progresses due to ongoing expense control and other actions to recover the Q1 shortfall. In addition, there is still a significant portion of the heating season ahead and we are encouraged that January was colder than normal in the U.S.

"We continue to advance on our strategy to further invest in renewables and rebalance our business in order to deliver reliable earnings growth. The Stonehenge acquisition that closed in January 2022 represents an important step in both our rebalancing and reliability efforts. This investment is in some of the most prolific production areas in the Appalachian Basin, is immediately accretive to earnings and has stable cash flows underpinned by a long-term contract with minimum volume commitments.

"In December 2021, we were pleased to receive regulatory approval of the intended joint venture with SHV Energy to produce rDME. In addition, we have announced several partnerships related to renewables, with the most recent being a partnership with Vertimass to produce and distribute renewable energy solutions within the U.S. and Europe. Our continued efforts to advance our ESG programs and activities were recognized with the upgrade to "AA" by MSCI."

### KEY DRIVERS OF FIRST QUARTER RESULTS

- *AmeriGas*: Lower total margin due to 13% decline in retail volume; higher average LPG unit margins due to effective margin management
- *UGI International*: Retail volume up 6% on weather that was 6.6% colder than the prior-year period; lower LPG and energy marketing margin with the significant increases and volatility in commodity prices
- *Midstream & Marketing*: Higher total margin reflecting increased margin from renewable energy marketing activities and capacity management
- *Utilities*: Higher earnings before interest expense and income taxes<sup>1</sup> ("EBIT") largely driven by incremental earnings from Mountaineer, higher gas base rates and implementation of a Distribution System Improvement Charge (DSIC) at UGI Utilities

### EARNINGS CALL AND WEBCAST

UGI Corporation will hold a live Internet Audio Webcast of its conference call to discuss the quarterly earnings and other current activities at 9:00 AM ET on Thursday, February 3, 2022. Interested parties may listen to the audio webcast both live and in replay on the Internet at <https://www.ugicorp.com/investors/financial-reports/presentations> or by visiting the company website <https://www.ugicorp.com> and clicking on Investors and then Presentations. A telephonic replay will be available from 12:00 PM ET on February 3 through 11:59 PM ET February 10. The replay

may be accessed toll free at [855-859-2056](tel:855-859-2056) and internationally at [+1 404-537-3406](tel:+1-404-537-3406), conference ID 9390638.

## ABOUT UGI

UGI Corporation is a distributor and marketer of energy products and services. Through subsidiaries, UGI operates natural gas and electric utilities in Pennsylvania, natural gas utilities in West Virginia, distributes LPG both domestically (through AmeriGas) and internationally (through UGI International), manages midstream energy assets in Pennsylvania, Ohio, and West Virginia and electric generation assets in Pennsylvania, and engages in energy marketing, including renewable natural gas, in the Mid-Atlantic region of the United States and California, and internationally in France, Belgium, the Netherlands and the UK.

Comprehensive information about UGI Corporation is available on the Internet at <https://www.ugicorp.com>.

## USE OF NON-GAAP MEASURES

Management uses "adjusted diluted earnings per share," a non-GAAP financial measure, when evaluating UGI's overall performance. Management believes that this non-GAAP measure provides meaningful information to investors about UGI's performance because it eliminates the impact of (1) gains and losses on commodity and certain foreign currency derivative instruments not associated with current-period transactions and (2) other significant discrete items that can affect the comparison of period-over-period results. Volatility in net income at UGI can occur as a result of gains and losses on commodity and certain foreign currency derivative instruments not associated with current-period transactions but included in earnings in accordance with U.S. generally accepted accounting principles ("GAAP").

Non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures.

Tables on the last page reconcile net (loss) income attributable to UGI Corporation, the most directly comparable GAAP measure, to adjusted net income attributable to UGI Corporation, and diluted (loss) earnings per share, the most comparable GAAP measure, to adjusted diluted earnings per share, to reflect the adjustments referred to above.

<sup>1</sup> Reportable segments earnings before interest expense and income taxes represents an aggregate of our operating segment level EBIT as determined in accordance with GAAP.

## USE OF FORWARD-LOOKING STATEMENTS

This press release contains statements, estimates and projections that are forward-looking statements (as defined in Section 21E of the Securities Exchange Act of 1934, as amended). Management believes that these are reasonable as of today's date only. Actual results may differ significantly because of risks and uncertainties that are difficult to predict and many of which are beyond management's control. You should read UGI's Annual Report on Form 10-K for a more extensive list of factors that could affect results. Among them are adverse weather conditions (including increasingly uncertain weather patterns due to climate change) resulting in reduced demand, and the seasonal nature of our business; cost volatility and availability of all energy products, including propane and other LPG, natural gas, and electricity, as well as the availability of LPG cylinders; increased customer conservation measures; the impact of pending and future legal or regulatory proceedings, inquiries or investigations; liability for uninsured claims and for claims in excess of insurance coverage; political, regulatory and economic conditions in the United States, Europe and other foreign countries, and foreign currency exchange rate fluctuations (particularly the euro); the timing of development of Marcellus and Utica Shale gas production; the availability, timing and success of our acquisitions, commercial initiatives and investments to grow our business; our ability to successfully integrate acquired businesses and achieve anticipated synergies; the interruption, disruption, failure, malfunction, or breach of our information technology systems, and those of our third-party vendors or service providers, including due to cyber-attack; the inability to complete pending or future energy infrastructure projects; our ability to achieve the operational benefits and cost efficiencies expected from the completion of pending and future transformation initiatives, including the impact of customer disruptions resulting in potential customer loss due to the transformation activities; uncertainties related to global pandemics, including the duration and/or impact of the COVID-19 pandemic; the impact of proposed or future tax legislation, including the potential reversal of existing tax legislation that is beneficial to us; and our ability to overcome supply chain issues that may result in delays or shortages in, as well as increased costs of, equipment, materials or other resources that are critical to our business operations.

## SEGMENT RESULTS (\$ in millions, except where otherwise indicated)

### AmeriGas Propane

<i>For the fiscal quarter ended December 31,</i>	2021	2020	Increase (Decrease)	
Revenues	\$ 778	\$ 666	\$ 112	17%
Total margin (a)	\$ 360	\$ 394	\$ (34)	(9) %
Operating and administrative expenses	\$ 240	\$ 221	\$ 19	9%
Operating income/earnings before interest expense and income taxes	\$ 86	\$ 141	\$ (55)	(39) %
Retail gallons sold (millions)	241	276	(35)	(13) %
Heating degree days - % warmer than normal (b)	(9.9) %	(4.6) %		
Capital expenditures	\$ 35	\$ 27	\$ 8	30%

- Temperatures were 6.2% warmer than the prior-year period and 12% warmer in December when compared to the prior-year.
- Retail gallons sold decreased 13% largely due to warmer weather, the impact of customer service challenges from the prior year after establishing the new operating business model, the effect of higher commodity prices on customer usage and the impact of COVID-19 on cylinder exchange and resale volumes.
- Total margin decreased \$34 million compared to the prior-year period primarily due to lower retail volumes (\$43 million), partially offset by higher average retail unit margins.
- Operating and administrative expenses increased \$19 million largely due to higher general insurance, vehicle fuel and

maintenance expenses, bad debt reserves and advertising expenses. These expenses were impacted by the inflationary cost environment.

- Operating income and earnings before interest expense and income taxes each decreased \$55 million compared to the prior-year period reflecting the lower total margin and higher operating and administrative expenses.

#### UGI International

<i>For the fiscal quarter ended December 31,</i>	2021	2020	Increase (Decrease)	
Revenues	\$1,049	\$ 700	\$ 349	50%
Total margin (a)	\$ 256	\$ 317	\$ (61)	(19) %
Operating and administrative expenses (a)	\$ 161	\$ 157	\$ 4	3%
Operating income	\$ 78	\$ 135	\$ (57)	(42) %
Earnings before interest expense and income taxes	\$ 82	\$ 136	\$ (54)	(40) %
LPG retail gallons sold (millions)	249	236	13	6%
Heating degree days - % colder (warmer) than normal (b)	5.0%	(2.0) %		
Capital expenditures	\$ 23	\$ 29	\$ (6)	(21) %

UGI International base-currency results are translated into U.S. dollars based upon exchange rates experienced during the reporting periods. Differences in these translation rates affect the comparison of line item amounts presented in the table above. The functional currency of a significant portion of our UGI International results is the euro and, to a much lesser extent, the British pound sterling. During the 2021 and 2020 three-month periods, the average unweighted euro-to-dollar translation rates were approximately \$1.14 and \$1.19, respectively, and the average unweighted British pound sterling-to-dollar translation rates were approximately \$1.35 and \$1.32, respectively.

- Retail volume increased 6% largely due to weather that was 6.6% colder than the prior-year period, favorable crop-drying campaign, and the recovery of certain autogas volumes that were negatively affected by the COVID-19 pandemic.
- Average propane wholesale selling prices in northwest Europe were approximately 100% higher than the prior-year period.
- Total margin decreased \$61 million compared to the prior-year period largely due to lower average LPG unit margins and total energy marketing margin, both impacted by significant increases and volatility in commodity prices. In addition, energy marketing margin was impacted by increased commodity cost due to higher-than-anticipated volumes purchased by certain customers through fixed price sales contracts. These impacts were partially offset by the translation effects of weaker foreign currencies (\$11 million).
- Operating income decreased \$57 million compared to the prior-year period largely due to lower total margin.
- Earnings before interest expense and income taxes decreased \$54 million compared to the prior-year period due to the lower operating income, partially offset by higher realized gains on foreign currency exchange contracts (\$3 million).

#### Midstream & Marketing

<i>For the fiscal quarter ended December 31,</i>	2021	2020	Increase (Decrease)	
Revenues	\$ 535	\$ 341	\$ 194	57%
Total margin (a)	\$ 122	\$ 104	\$ 18	17%
Operating and administrative expenses	\$ 29	\$ 32	\$ (3)	(9) %
Operating income	\$ 74	\$ 52	\$ 22	42%
Earnings before interest expense and income taxes	\$ 82	\$ 59	\$ 23	39%
Heating degree days - % warmer than normal (b)	(15.8) %	(5.0) %		
Capital expenditures	\$ 6	\$ 17	\$ (11)	(65) %

- Temperatures were 11.4% warmer than the prior-year period.
- Total margin increased \$18 million primarily reflecting increased margins from renewable energy marketing activities (\$12 million) and capacity management compared to the prior-year period.
- Operating income increased \$22 million primarily reflecting the increase in total margin and lower operating and administrative expenses, in comparison to the prior-year period.

#### Utilities

<i>For the fiscal quarter ended December 31,</i>	2021	2020	Increase	
Revenues	\$ 419	\$ 300	\$119	40%
Total margin (a)	\$ 213	\$ 167	\$ 46	28%
Operating and administrative expenses	\$ 80	\$ 60	\$ 20	33%
Operating income	\$ 96	\$ 77	\$ 19	25%
Earnings before interest expense and income taxes	\$ 98	\$ 78	\$ 20	26%
Gas Utility system throughput - billions of cubic feet				
Core market	29	23	6	26%
Total	93	83	10	12%
Gas Utility heating degree days - % warmer than normal (b)	(15.1) %	(9.8) %		
Capital expenditures	\$ 111	\$ 79	\$ 32	41%

- Gas Utility service territory experienced temperatures that were 7.9% warmer than the prior-year period.
- Core market and total gas utility volumes increased due to the incremental volume from Mountaineer.
- Total margin increased \$46 million compared to the prior-year period primarily reflecting the incremental margin from Mountaineer (\$33 million), higher gas base rates that went into effect in Fiscal 2021, and a Distribution System Improvement Charge that was implemented effective April 1, 2021.
- Operating income increased \$19 million compared to the prior-year period largely reflecting the higher total margin, partially offset by higher operating and administrative expenses and higher depreciation expense both principally due to the incremental expenses attributable to Mountaineer.

(a) Total margin represents total revenue less total cost of sales.

(b) Deviation from average heating degree days is determined on a 10-year period utilizing volume-weighted weather data.

#### REPORT OF EARNINGS – UGI CORPORATION

(Millions of dollars, except per share)

(Unaudited)
